Keywords: Register, Unit Pelayanan Internet

Certain profession often uses special term of language or vocabulary when they are interacting or communicating with each other. Language used at Unit Pelayanan Internet of UMM for instance consists of special term which is understood by certain people only. A community prefers to use particular variety of language because they want to make it easier to communicate with each other. The researcher of this thesis discussed the registers used by UPI community. The research was aimed to identify registers used at Unit Pelayanan Internet, the meanings of registers used at Unit Pelayanan Internet, and occasions when the registers were used.

In this study, the writer used a descriptive qualitative research design. The informant of this study was the networking team of UPI community. To collect the data, the writer used observation and interview. In the observation, the writer observed the dialogues among the staff and the client. To analyze the data, the writer used several steps as follows: 1) Arranging the data, 2) Deciding the registers, 3) Giving the explanation of the meanings of the registers found, 4) Deciding the occasion in which the population used the register, 5) Drawing conclusion based on the analyzed data. The result of this study showed that there were 147 registers used in Unit Pelayanan Internet of UMM. The registers were used in such activities as meeting and working, the second was in training conduct, the third was when they conducted recruitment test and the fourth was when the staff talked to client.
