Law concerning Abolition Of Hardness In Household invite no 23 year 2004, is important bollard in household definition in Indonesia society. In the law arranged the prohibition order hardness to woman covering: hardness of physical, psychical hardness, hardness of sexual, or neglected of household. Besides is also arranged various form off is solving of various problem which emerge as hardness effect in household. Therefore, problems in household related to hardness and conflict to household member which during the time always to close because viewed as by region of private turn into public region.

Such as happened in Probolinggo, almost 40% child have experienced of to act hardness in household, to 30% him is economic them of middle him downwards. But reported case in police note as doing an injustice less than 10%. This matter there is many factor which is backgrounds why hardness in natural household specially by child have never isn't it. There is many kinds of hardness forms in natural household by child, and this become researcher background do this research.

Pursuant to from above phenomenon, hence researcher of inspiration to do research with title "Study About Form Act Hardness To Child In Household In Countryside of Kalirejo, District Of Dringu, Sub-Province of Probolinggo". Intention of this research is 1. To identify form act hardness to anak.2. Untuk know factor which is background off is existence of form act abuse to child in house of tangga.3. To know natural hardness impact by child.

This research with included in type research of descriptive with approach qualitative. Location research of Countryside of Kalirejo District Of Dringgu, Sub-Province of Probolinggo, because of in the area there are hardness action to child in household.

From research result can be obtained by informant presentation data, known by that any him have got hardness of physical of his parent, is among others kicked, to be rammed to be to be beatened, to be pinched etc. While acting psychical hardness like abused, in squawking, to be menaced etc. But hardness of emotional, economic, and social only BC and of BB the his naturalness.

As for this research recommendation is For hardness victim (child) better dare to rebel from behaviour of natural hardness by way of deliberation or discussion if finishing a[n problem, because as child have the right to get affection and protection of our parent. For parent shall more attention and treat the child of as within reason Parent shall can behave democratic to his child. To prevent the existence of acting hardness to further child, can be done to pass AJI forums, which parent as the focus of him. Require to presumably Society organization structure, self-supporting institute of society (LSM) the special ness of to advocacy cases act hardness to anan in household and or KDRT. As bridge for trouble-shooting. Because in Sub-Province of Probolinggo there is no institute which is active in protection of child. And also socialize children right and protection of child, and also strive stages; steps of concrete if there is occurrence which concerning a period of/to child. UU RI number 23 year 2002 concerning
Protection of Child have in ratifying and specified. Becoming obligation of government to socialize more real to invitation, so that society more that hardness to child get crime sanction.
