ABSTRACT

Republic of Indonesia State aim to form prosperous and fair public based on Five Principles. In its effort, state meets many barricades generated by lawbreaker. By catching, judges, and enters them into LAPAS, state duty has not completed and exactly has just been started, because punished in a moment is released again in public must become respecting to the law member, good for public, and socialization can with public.

Research is done in LAPAS Wanita Malang (Malang Woman Prison) as a mean to know at the same time description of utilization programs, how its execution, and resistance faced by officer in execution of utilization program of woman convict in LAPAS Wanita Malang.

With qualitative approach and data collecting technique in the form of interview, observation and documentation, found indicating that research result, utilization program in LAPAS Wanita Malang consisted of personality utilization program (awareness utilization believes in, awareness utilization of nation and state, intellectual utilization, sense of justice utilization, integration utilization with public), and independence utilization program (in the form of femininity handicraft).

In its execution officer assisted by teacher from outside LAPAS. Resistances faced between it: supporting facilities which unable to be adequate, lack of officer and past master, factors from within convict itself like feeling slack, bored, etc.

Although in its execution, officer has coped is maximum in implementing utilization program to convict with a purpose to that convict regains to midst public and becomes member of public that is meekly law, solvent of socialization with public, good for public, doesn't repeat crime, and others, but it all back again into each convict itself. Because we cannot change someone itself without willingness and effort from people.

From result of research, can be given suggestions as follows: 1). Officer handling utilization program to need in multiplying, and not happened overlap between each duty, 2). Utilization program in the form of integration with public need to be improved, 3) Independence utilization program in the form of skill need to be renewed, so that not epoch uniqueness, 4) Need to be done coordination on dutyly labour and on duty skilled training usage industry of convict and result marketing.
