Purpose Education National how goods ectrusted too by code of law number 2 year 1989 about system education national is to intelligent live nation and develop Indonesia people whole is religeous faith people and piety, to God, good character, health, and have knowledge, able, creative stand alone and become nation country democracy and responsibility. In to terrace quality education government in matter department education nation always try organite rehabilitaion in all broad. Once efforts in to develop quality study is with carrying out metode study community suitable with demand prosecution be valid so that can to grow effective student in process teach and study use get achivvement study. This riset purpose for to develop product study student class X SMA Taman Madya Donomulyo at semester two in biologi teach. That efforts to do need for conclend low product study with carrying out metode study community. Plan mode riset carrying in this risets is riset action class(RAC) who opinion by Kemnis & MC. Taggart. Naw model RAC purpose description presence four step (and replay), is plan, bring about, obsevasi, and refleksi. RAC will be bring about in three sicklus. Student who be given action is student class X SMA Taman Madya Donomulyo at semester 2 year obtain in education 2007/2008 which add 42 student divisible become 7 community which to study discuss 1 point criticism is ecosistem and carrying people, in balanced, variable riset is achiivement study and analisis data which be use is presentase.

Product riset so that sicklus I happen increase average product study class equivalent with berfore RAC is from 60,80 become 61,07, at sicklus II and sicklus III increase become 64,64 and 71,07 finished klasical also increase in a regular before RAC, sicklus I, II, and III successively is 52,38%, 61,90%, 76,19% and 92,85%. Price low student before RAC is 40 and that end sicklus III become 50.

Be based on product riset at end sicklus III can conclude that carrying metode study community in teach biology at student clas X in SMA Taman Madya onomulyo can increase study student meadow kognitif and respon student about teach with use metode study community very antusias and very good proven with many student who answer yes asbigas 97,6% and student who answer not so that this teach is 43%.
