ABSTRACT

Speaking skill is very important because it is as an important tool to communicate each other. With communication, people can express their ideas creatively. Therefore, speaking should be introduced in every school. The success of teaching speaking is influenced by the technique which is used by the teacher. By using a good technique, the teacher is able to attract the students more active in speaking. Based on the reason above, the writer investigated the technique of teaching speaking used by the teacher of second year class at SMAN 1 Pandaan.

In this study, the writer used descriptive qualitative research and the subject of this study was English teachers who taught English at SMAN 1 Pandaan. There were six teachers. Four of them taught international class. One class consisted of two teachers or team teaching and two of them taught the regular class. This research is to compare teaching technique used by teacher of international class and teacher of regular class. To collect the data, the writer did some observation and interview to the teachers.

The result of this study showed that the techniques used by the teachers of international class in teaching speaking were role-play, one quick question, and describing picture. In addition, the techniques used by the teachers of regular class were dialogue, telling story and discussion.
