ABSTRAK

Candrika Adhana Paramita, 2024, 202010360311285, Universitas Muhammadiyah Malang, Fakultas Ilmu Sosial dan Ilmu Politik, Program Studi Hubungan Internasional, Dampak Sanksi Uni Eropa ke Rusia Terhadap Keamanan Energi Jerman, Dosen Pembimbing I: Dedik Fitra Suhermanto, M.Hub.Int., Dosen Pembimbing II: Azza Bimantara, M.A.

Konflik antara Rusia dan Ukraina merupakan salah satu topik hangat yang saat ini tengah diperbincangkan dalam dunia internasional. Keputusan Presiden Vladimir Putin untuk mengirim pasukan militer Rusia ke Ukraina pada 24 Februari 2022 merupakan awal dari konflik antara Rusia dan Ukraina, terhitung hingga hari ini dimana penelitian ini disusun, konflik antara kedua negara tersebut masih berlangsung. Penelitian ini menggunakan metode penelitian deskriptif dengan teknik analisa data kualitatif dan teknik library research yang mengumpulkan data melalui buku, laporan, jurnal, e-book, working paper, artikel, dan berita online yang berkaitan dengan masalah penelitian. Penelitian ini juga menggunakan Teori Sanksi Internasional dan Konsep Rezim Keamanan Energi. Penelitian ini dilatarbelakangi oleh invasi Rusia ke Ukraina yang kemudian memicu Uni Eropa untuk menjatuhkan sanksi terhadap Rusia. Hasil penelitian ini menunjukkan bahwa sanksi ekonomi yang diberikan oleh Uni Eropa kepada Rusia berdampak pada keamanan energi Jerman terutama dalam aspek ekonomi dan sosial. Sanksi Uni Eropa terhadap Rusia membuat Jerman harus menghadapi krisis energi karena ketergantungan akan gas alam dan minyak Rusia.

ABSTRACT

Candrika Adhana Paramita, 2024, 202010360311285, University of Muhammadiyah Malang, Faculty of Social and Political Science, International Relation Study Program, The Impact of EU Sanctions to Russia on Germany's Energy Security, Advisor I: Dedik Fitra Suhermanto, M.Hub.Int., Advisor II: Azza Bimantara M.A.

The conflict between Russia and Ukraine is one of the hot topics currently being discussed internationally. President Vladimir Putin's decision to send Russian military forces to Ukraine on February 24, 2022 was the beginning of the conflict between Russia and Ukraine, as of today when this research was compiled, the conflict between the two countries is still ongoing. This research uses descriptive research methods with qualitative data analysis techniques and library research techniques that collect data through books, reports, journals, e-books, working papers, articles, and online news related to the research problem. This research also uses International Sanctions Theory and the Concept of Energy Security Regime. This research is motivated by Russia's invasion of Ukraine which then triggered the European Union to impose sanctions against Russia. The results of this study show that the economic sanctions imposed by the European Union on Russia have an impact on Germany's energy security, especially in economic and social aspects. The EU sanctions against Russia have forced Germany to face an energy crisis due to its dependence on Russian natural gas and oil.
