ABSTRAK

Pendahuluan:Berdasarkan Riskesdas tahun 2018 penderita PJK sebesar 15 dari 1000 orang.Menurut WHO kurang lebih 17,9 juta terdiagnosis penyakit kardiovaskular dan menyumbang kematian global sebanyak 32%.Beberapa penelitian menunjukkan adanya perbedaan hasil terkait penelitian hubungan BMI terhadap derajat stenosis dan letak lesi pada PJK. **Tujuan:**Untuk mengetahui hubungan BMI terhadap Derajat Keparahan Lesi Koroner pada pasien angiografi koroner berdasarkan Sullivan Stenosis Score pada pasien PJK di RSUD UMM pada tahun 2022. **Metode:**Penelitian menggunakan metode analitik observasional,Teknik pengambilan sampel dengan simple random sampling,menggunakan data rekam medis sebanyak 152 sampel.Data dianalisis menggunakan SPSS dengan uji korelasi eta. **Hasil:**Hasil penelitian menunjukkan jumlah pasien PJK dengan BMI kurus sebanyak 2 penderita (1,3%), normal sebanyak 47 penderita (30,9%),*overweight* sebanyak 34 penderita (22,4%) dan obesitas I sebanyak 51 penderita (33,6%) serta obesitas II sebanyak 17 penderita (11,2%).Hasil penelitian menunjukkan terdapat hubungan antara BMI dengan derajat keparahan lesi koroner ($p=0,029$ $r=0,265$ $r^2=0,07$).Pada arteri koroner yang memiliki hubungan dengan BMI hanya RCA dan LCX ($p=0,036$ dan $p=0,049$) dan LM dan LAD tidak memiliki hubungan dengan BMI ($p=0,070$ dan $p=0,416$).**Kesimpulan:**Terdapat hubungan antara BMI dengan derajat keparahan lesi koroner berdasarkan Sullivan stenosis skor tetapi korelasinya lemah.

Kata kunci :PJK,Keparahan PJK,Sullivan Stenosis Score

ABSTRACT

Introduction: Based on Riskesdas in 2018 CHD sufferers were 15 out of 1000 people. According to WHO, approximately 17.9 million were diagnosed with cardiovascular disease and contributed to 32% of global deaths. Several studies have shown differences in results related to research on the relationship between BMI to the degree of stenosis and the location of lesions in CHD. **Objective:** To determine the relationship of BMI to the Degree of Stenosis and Lesion Location in coronary angiography patients based on the Sullivan Stenosis Score in CHD patients at UMM General Hospital in 2022. **Methods:** The study used observational analytical methods, sampling techniques with simple random sampling, using medical record data as many as 152 samples. Data were analyzed using SPSS with the eta correlation test. **Results:** The results showed the number of CHD patients with BMI thin as many as 2 patients (1.3%), normal as many as 47 patients (30.9%), overweight as many as 34 patients (22.4%) and obesity I as many as 51 patients (33.6%) and obesity II as many as 17 patients (11.2%).The results showed there was a relationship between BMI and the degree of stenosis ($p = 0.029$ $r = 0.265$). In the location of lesions that have a relationship with BMI only RCA and LCX ($p=0.036$ and $p=0.049$) and LM and LAD have no relationship with BMI ($p=0.070$ and $p=0.416$).**Conclusion:** There was an association between BMI and the severity of coronary lesions based on the Sullivan stenosis score but the correlation was weak.

KATA PENGANTAR

Assalamu'alaikum Warahmatullahi Wabarakatuh

Puji syukur saya panjatkan kepada Tuhan Yang Maha Esa karena atas karunia dan rahmat-Nya, penulis mampu menyelesaikan penelitian ini yang berjudul “Hubungan BMI terhadap Derajat keparahan lesi koroner pada pasien angiografi koroner pada tahun 2022 di RSUD UMM”. Tugas akhir ini diajukan untuk memenuhi persyaratan Pendidikan Sarjana Fakultas Kedokteran Universitas Muhammadiyah Malang.

Penulis menyadari tugas akhir ini masih banyak kekurangan, oleh karena itu penulis mengharapkan adanya saran dan masukan yang membangun untuk penelitian ini. Semoga penelitian ini dapat memberikan informasi dan tambahan wawasan yang bermanfaat bagi semua pihak.

Wassalamu'alaikum Warahmatullahi Wabarakatuh

Malang, 19 Juni 2024

HASIL DETEKSI PLAGIASI

Berikut ini adalah hasil deteksi plagiasi karya ilmiah (naskah proposal / naskah hasil penelitian / naskah publikasi)*

Nama : Jordan P. P.
Nim : 202010330211105
Judul : Hubungan BMI Terhadap Derajat keparahan lesi koroner pada pasien angiografi koroner tahun 2022 di RSU Umm

| NO | Bagian | Maksimum Kesamaan | Hasil Deteksi | | |
|----|---|-------------------|---------------|-----|-----|
| | | | Tgl | Tgl | Tgl |
| 1 | Bab 1 (Pendahuluan) | 10 | 9 | | |
| 2 | Bab 2 (Tinjauan Pustaka) | 25 | 0 | | |
| 3 | Bab 3 dan 4 (Kerangka Konsep & Metodologi) | 35 | 22 | | |
| 4 | Bab 5 dan 6 (Hasil dan Pembahasan) | 15 | 0 + 13 | | |
| 5 | Bab 7 (Kesimpulan dan Saran) | 5 | 0 | | |
| 6 | Naskah Publikasi | 25 | 0 | | |

Kesimpulan Deteksi Plagiasi : ~~LOLOS / TIDAK LOLOS PLAGIASI~~ LOLOS / TIDAK LOLOS PLAGIASI

Mengetahui
Pembimbing I

(dr. Indra Wahyu Sahputra SPP (K) Fika
